Applicant

THE PROCTER & GAMBLE COMPANY et al.

1. ☒ The applicant is hereby notified that the International Search Report has been established and is transmitted herewith.

Filing of amendments and statement under Article 19

The applicant is entitled, if he so wishes, to amend the claims of the International Application (see Rule 46):

When? The time limit for filing such amendments is normally 2 months from the date of transmittal of the International Search Report; however, for more details, see the notes on the accompanying sheet.

Where? Directly to the International Bureau of WIPO
34, chemin des Colombettes
1211 Geneva 20, Switzerland
Facsimile No.: (41-22) 740.14.35

For more detailed instructions, see the notes on the accompanying sheet.

2. ☐ The applicant is hereby notified that no International Search Report will be established and that the declaration under Article 17(2)(a) to that effect is transmitted herewith.

3. ☐ With regard to the protest against payment of (an) additional fee(s) under Rule 40.2, the applicant is notified that:

☐ the protest together with the decision thereon has been transmitted to the International Bureau together with the applicant's request to forward the texts of both the protest and the decision thereon to the designated Offices.

☐ no decision has been made yet on the protest; the applicant will be notified as soon as a decision is made.

4. **Further action(s):** The applicant is reminded of the following:

Shortly after 18 months from the priority date, the international application will be published by the International Bureau. If the applicant wishes to avoid or postpone publication, a notice of withdrawal of the international application, or of the priority claim, must reach the International Bureau as provided in Rules 90bis.1 and 90bis.3, respectively, before the completion of the technical preparations for international publication.

Within 19 months from the priority date, a demand for international preliminary examination must be filed if the applicant wishes to postpone the entry into the national phase until 30 months from the priority date (in some Offices even later).

Within 20 months from the priority date, the applicant must perform the prescribed acts for entry into the national phase before all designated Offices which have not been elected in the demand or in a later election within 19 months from the priority date or could not be elected because they are not bound by Chapter II.

These Notes are intended to give the basic instructions concerning the filing of amendments under article 19. The Notes are based on the requirements of the Patent Cooperation Treaty, the Regulations and the Administrative Instructions under that Treaty. In case of discrepancy between these Notes and those requirements, the latter are applicable. For more detailed information, see also the PCT Applicant's Guide, a publication of WIPO.

In these Notes, "Article", "Rule", and "Section" refer to the provisions of the PCT, the PCT Regulations and the PCT Administrative Instructions respectively.

INSTRUCTIONS CONCERNING AMENDMENTS UNDER ARTICLE 19

The applicant has, after having received the international search report, one opportunity to amend the claims of the international application. It should however be emphasized that, since all parts of the international application (claims, description and drawings) may be amended during the international preliminary examination procedure, there is usually no need to file amendments of the claims under Article 19 except where, e.g. the applicant wants the latter to be published for the purposes of provisional protection or has another reason for amending the claims before international publication. Furthermore, it should be emphasized that provisional protection is available in some States only.

What parts of the international application may be amended?

Under Article 19, only the claims may be amended.

During the international phase, the claims may also be amended (or further amended) under Article 34 before the International Preliminary Examining Authority. The description and drawings may only be amended under Article 34 before the International Examining Authority.

Upon entry into the national phase, all parts of the international application may be amended under Article 28 or, where applicable, Article 41.

When?

Within 2 months from the date of transmittal of the international search report or 16 months from the priority date, whichever time limit expires later. It should be noted, however, that the amendments will be considered as having been received on time if they are received by the International Bureau after the expiration of the applicable time limit but before the completion of the technical preparations for international publication (Rule 46.1).

Where not to file the amendments?

The amendments may only be filed with the International Bureau and not with the receiving Office or the International Searching Authority (Rule 46.2).

Where a demand for international preliminary examination has been/is filed, see below.

How?

Either by cancelling one or more entire claims, by adding one or more new claims or by amending the text of one or more of the claims as filed.

A replacement sheet must be submitted for each sheet of the claims which, on account of an amendment or amendments, differs from the sheet originally filed.

All the claims appearing on a replacement sheet must be numbered in Arabic numerals. Where a claim is cancelled, no renumbering of the other claims is required. In all cases where claims are renumbered, they must be renumbered consecutively (Administrative Instructions, Section 205(b)).

The amendments must be made in the language in which the international application is to be published.

What documents must/may accompany the amendments?

Letter (Section 205(b)):

The amendments must be submitted with a letter.

The letter will not be published with the international application and the amended claims. It should not be confused with the "Statement under Article 19(1)" (see below, under "Statement under Article 19(1)").

The letter must be in English or French, at the choice of the applicant. However, if the language of the international application is English, the letter must be in English; if the language of the international application is French, the letter must be in French.

The letter must indicate the differences between the claims as filed and the claims as amended. It must, in particular, indicate, in connection with each claim appearing in the international application (it being understood that identical indications concerning several claims may be grouped), whether

- (i) the claim is unchanged;
- (ii) the claim is cancelled;
- (iii) the claim is new;
- (iv) the claim replaces one or more claims as filed;
- (v) the claim is the result of the division of a claim as filed.

The following examples illustrate the manner in which amendments must be explained in the accompanying letter:

1. [Where originally there were 48 claims and after amendment of some claims there are 51]:
"Claims 1 to 29, 31, 32, 34, 35, 37 to 48 replaced by amended claims bearing the same numbers; claims 30, 33 and 36 unchanged; new claims 49 to 51 added."
2. [Where originally there were 15 claims and after amendment of all claims there are 11]:
"Claims 1 to 15 replaced by amended claims 1 to 11."
3. [Where originally there were 14 claims and the amendments consist in cancelling some claims and in adding new claims]:
"Claims 1 to 6 and 14 unchanged; claims 7 to 13 cancelled; new claims 15, 16 and 17 added." or
"Claims 7 to 13 cancelled; new claims 15, 16 and 17 added; all other claims unchanged."
4. [Where various kinds of amendments are made]:
"Claims 1-10 unchanged; claims 11 to 13, 18 and 19 cancelled; claims 14, 15 and 16 replaced by amended claim 14; claim 17 subdivided into amended claims 15, 16 and 17; new claims 20 and 21 added."

"Statement under article 19(1)" (Rule 46.4)

The amendments may be accompanied by a statement explaining the amendments and indicating any impact that such amendments might have on the description and the drawings (which cannot be amended under Article 19(1)).

The statement will be published with the international application and the amended claims.

It must be in the language in which the international application is to be published.

It must be brief, not exceeding 500 words if in English or if translated into English.

It should not be confused with and does not replace the letter indicating the differences between the claims as filed and as amended. It must be filed on a separate sheet and must be identified as such by a heading, preferably by using the words "Statement under Article 19(1)."

It may not contain any disparaging comments on the international search report or the relevance of citations contained in that report. Reference to citations, relevant to a given claim, contained in the international search report may be made only in connection with an amendment of that claim.

Consequence if a demand for international preliminary examination has already been filed

If, at the time of filing any amendments under Article 19, a demand for international preliminary examination has already been submitted, the applicant must preferably, at the same time of filing the amendments with the International Bureau, also file a copy of such amendments with the International Preliminary Examining Authority (see Rule 62.2(a), first sentence).

Consequence with regard to translation of the international application for entry into the national phase

The applicant's attention is drawn to the fact that, where upon entry into the national phase, a translation of the claims as amended under Article 19 may have to be furnished to the designated/elected Offices, instead of, or in addition to, the translation of the claims as filed.

For further details on the requirements of each designated/elected Office, see Volume II of the PCT Applicant's Guide.

Ad I.3

1. The newly introduced feature (c) of the independent claims 1 and 3 concerning the concentration of amine oxide surfactant does not seem to be based on the disclosure as filed. While the passage page 23, lines 10-15, right column discloses a composition consisting of 0.1 to 4% BPP, 0.1 to 0.5% C12-C14 alkyl sulfate and 95 to 99.8% water, the percentage of nonionic surfactant is from 0.0 to 0.5% and not from 0.1 to 0.5%, as specified in the claims.

1. Ad V:

Reference is made to the following documents:

D1: US-A-51 22158

D2: WO-A-9720099

2. From D2, figures and corresponding description, particularly example 79, page 45, a process according to claims 1 and 3 is known, which comprises applying a cleaning composition to a stained area of a fabric which is in contact with an absorbent and applying mechanical action to said stain by means of a cleaning device while covering the stain with the distal end of the dispenser cap (see figure 1). D2 discloses cleaning compositions which may comprise butoxy propoxy propanol (see page 35, line 2), C8-C18 alkyl sulfates (see page 10, second paragraph), amine oxide (see page 9, second paragraph) and water (see page 35, line 7). The only features of claims 1 and 3 not explicitly mentioned in D2, the specific concentrations, have to be regarded as mere result of an optimization the skilled person can carry out without the exercise of an inventive activity.

From D1, in particular figures 1-5 and corresponding description, a process according to claims 1 and 3 is known, which comprises applying a cleaning composition to a stained area of a fabric and applying mechanical action to said stain by means of a cleaning device (2) while covering the stain with a protective

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/US98/15003

covering material (1), which is considered as sheet, to minimize abrasion. The features not mentioned in D1, the specific cleaning compositions have to be regarded as lying within the skilled person's general knowledge and cannot sustain an inventive step.

For lack of an inventive step the claims 1 and 3 do not meet the requirements of Article 33(3) PCT.

- 3.1 The skilled person is able to choose the optimal geometric form of the dispenser tip, as mentioned in claims 2 and 4 without the exercise of an inventive activity.

The same objection is valid for the stain receivers according to claims 5-7.

For lack of an inventive step the claims 2 and 4 to 7 do not meet the requirements of Article 33(3) PCT.

4. The industrial applicability is evident.

Ad VIII:

As the independant claims 1 and 3 prescribe that the cleaning composition has a minimum content of 0.1% for each of (a), (b) and (c), the percentage of (d) cannot be 99.8%. Thus these claims cannot be considered as clear (Article 6 PCT).

WHAT IS CLAIMED IS:

1. In a process for removing stains from a localized area of a fabric with no or minimal visible fabric damage, comprising the steps of applying a cleaning composition to said stain, covering the stain with a sheet of protective covering material and, concurrently or consecutively therewith, applying mechanical action to said stain by means of a cleaning device, characterized in that the cleaning composition comprises, by weight of the composition:
 - (a) from 0.1 to 4.0% butoxy propoxy propanol;
 - (b) from 0.1 to 0.5% C₁₂-C₁₄ alkyl sulfate surfactant;
 - (c) from 0.1 % to 0.5 % of an amine oxide surfactant; and
 - (d) from 95 to 99.8% of water.
2. A process according to Claim 1 wherein the tip is concave, convex or flat.
3. In a process for removing stain from a localized stained area on a fabric, comprising:
 - (a) placing the stained area of the fabric over and in contact with an absorbent material;
 - (b) applying a liquid cleaning composition to said stain from a container having a dispenser spout; and
 - (c) concurrently or consecutively with step (b), rubbing or pressing said cleaning composition into said stain using the distal tip of said spout, whereby said stain is transferred into the absorbent material, characterized in that: the cleaning composition comprises, by weight of the composition:
 - (a) from 0.1 to 4.0% butoxy propoxy propanol;
 - (b) from 0.1 to 0.5% C₁₂-C₁₄ alkyl sulfate surfactant;
 - (c) from 0.1 % to 0.5 % of an amine oxide surfactant; and
 - (d) from 95 to 99.8% of water.
4. A process according to Claim 3 wherein the tip of said spout is concave, convex or flat.
5. A process according to Claim 3, wherein the absorbent stain receiver is a FAM-foam receiver.
6. A process according to Claim 3, wherein the absorbent stain receiver is a ASRA receiver.
7. A process according to Claim 3 wherein the ASRA is a TBAL stain receiver.
